SKILLS

Technical

Python, JavaScript
React Native / Expo, Node.js, Django,
Express.js, Python
MongoDB, PostgreSQL, Containerization,
Git, UML Modeling, Laravel, Flutter
Software design and architecture
Cybersecurity
AI integration (TensorFlow, OpenCV)

Soft Skills

Autonomy Teamwork
Adaptability Problem-solving
Time management

ACHIEVEMENTS

Lifeline Saver Project

Design and development of an intelligent car accident detection system with automatic emergency messaging, enabling rapid alerts to emergency services and contacts, reducing response time and improving user safety.

NextLuk Smart Fashion & Beauty Platform

AI-based smart platform connecting clients, stylists, tailors, and suppliers around custom clothing creation: automatic body measurement, virtual try-on, digital twin, and order booking and tracking.

Learning-Focused Achievement

Completion of hands-on cybersecurity labs (Cisco, TryHackMe), building practical skills in threat detection and prevention.

Academic Achievement

Participation in an academic software engineering competition involving needs analysis, UML modeling, and development of an application that strengthened software design and teamwork skills.

Strengthened Network Security

Installation and security hardening of systems, improving application protection by 80%.

INTERESTS

Programming
Reading
Football
Research and analysis
Problem-solving and logic
Innovation

TEKENG DJANG YVAN DUPLEX PACOM

INFORMATION TECHNOLOGY ENGINEER

SUMMARY

I am a motivated candidate with strong academic results and several recognized certifications. Passionate about continuous learning, I aim to put my skills at the service of a company, deepen my knowledge, and actively contribute to its projects.

A committed graduate with a strong capacity for learning and adaptability, I aim to use my skills and certifications to successfully meet professional challenges and actively take part in the life of the company.

EXPERIENCE

Welldone & Co Enterprise

06/2025 - 09/2025

Student Intern

- Installation and configuration of computer systems
- Development of digital solutions.
- Participation in network security management
- Technical support for internal users

Project - Malware Detection in Python

02/2025 - 05/2025

Hackathon

- Development of a script to analyze suspicious files
- Use of classification algorithms to identify threats

Academic Project - Information Security

01/2026 - 02/2026

University Project

- Study of cybersecurity concepts: confidentiality, integrity, availability
- Simulation of basic attacks and risk analysis
- Writing technical reports and presenting solutions

EDUCATION

Computer Engineering Degree

11/2025 – 09/2026

African Institute of Computer Science

Higher Technician Diploma (DTS), Software Engineering (With Distinction)

10/2023 - 10/2025

African Institute of Computer Science

GCE Advanced Level & GCE Ordinary Level, Science option (With Distinction)

09/2016 - 08/2023

Lycée Bilingue de Bobongo Petit Paris

First School Leaving Certificate

09/2010 - 06/2015

Groupe Scolaire Bilingue Les Petits Génies
